

## THE AUSTIN GENEALOGICAL SOCIETY NEWSLETTER

Next Meeting: September 26, 2017

### **More than Daughters: Using the DAR's Genealogical Research System (GRS) by Teresa Devine**

Speaker Teresa Devine

The Daughters of the American Revolution (DAR) has made more than a century's worth of genealogical records accessible to all researchers. A variety of records have been digitized and made available through many databases and resources using the DAR Genealogical Research System (GRS). This presentation will help researchers understand how to access and search the GRS and how to evaluate the different types of records found within.

**Teresa Devine** began dabbling in family history research more than ten years ago, but didn't get serious about genealogy until 2011 when her oldest living paternal relative passed away taking her memories of the family

### **Genealogy Conversation Starters**

For our September, October, and November meetings we are gathering the names of our veterans both past and present. Please bring the names of the veterans in your family tree and

with her. Teresa realized that family stories can easily disappear unless someone purposely works to save them. She specializes in southern U.S. research, serves on the Lineage Research committee for the Andrew Carruthers DAR chapter, and her daughters were recently accepted into the Mayflower Society based on Teresa's research. She is a member of the Williamson County Genealogical Society and a board member for the Austin Genealogical Society.

## Two-Part AGS Class Begins in September

We have an exciting new two-part class beginning in September! The Land Workshops developed and taught by AGS Education Chair, Cari Taplin C.G., are designed to be working sessions with practice exercises and class participation. Both classes are free, however registration is required so be sure and register to reserve your space.

Have you ever wondered how to draw those land descriptions from the Metes & Bounds survey system? This system was used primarily in the original thirteen colonies and so is mostly found when dealing with land in the east. Or the rectangular survey system? This system was used in the Federal Land states to survey and sell the land to private citizens.

This two-part workshop will describe both systems and then take the students through some real examples teaching them how to draw the land shapes as described in old deeds.

*Please bring a ruler and pencil to both classes.*

**Saturday, September 16, 10:30a-Noon**

write them on the poster boards before the meeting. You can also add the branch of service and/or unit information and dates served.

---

## DNA and Genealogy

### Preparation for Blaine Bettinger's Seminar in May 2018

*by AGS Member Debbe Tipping*

yDNA comes from the Y chromosome. It is one of the chromosomes that determine the sex of a child. Only men have Y chromosomes. The Y chromosome is unique because the order of the genes does not change very often. It is possible that any man reading these words has the same, or nearly the same, Y chromosome as his tenth great-grandfather, a man who lived 440 to 660 years ago.

The continuity of genetic information allows us to test for the following:

- African or Native American heritage of the male line
- Whether the two men we are comparing are from the same male line
- From which of two men, who are not related, a person descends from

This continuity of genetic information also prevents us from determining close male relationships. It is impossible to sort those close relationships out with yDNA alone. As you can see from the chart below, this test is limited to the males in a specific line. So this test alone leaves many potential relatives untested.

After the general definitions of the yDNA test, let's look at some examples of how this test can help us.

Posts on this site include genealogy-related topics such as webinars, websites, and classes not sponsored by AGS. Members of the group may request help with any particular issue they are experiencing with their own research.

[Austin Genealogical Society Writing](#)

[SIG](#) (closed group) - AGS Members interested in writing a personal or family history are encouraged to join this Facebook group and attend the monthly meetings (see below for details.)

### CHECK OUT OUR CALENDAR!

The latest schedule for AGS classes, events and meetings is always available on the website [here](#).

### AGS DNA SIG

***First Tuesday of every month. Next meeting October 3, 6:30 – 8:30 PM***

**Pok-E-Joe's**

[2121 Parmer Lane, Austin, TX 78727](#)

*Three blocks east of*

Box = Men; Circle = Women

Family lore suggests that you have Algonquian ancestors. A yDNA SNP test can help you confirm or disprove this story. SNP is the acronym for single nucleotide polymorphism. It is pronounced, "Snip." It is a variation of only one nucleotide pair in the yDNA at a specific location on the DNA.

Think of your DNA as a beaded necklace. Each person's necklace is almost the same. Only 2% of your necklace is different than mine. In the case of a SNP, you and I lay our necklaces flat, line up the beads, and compare them. At one spot, I have a blue bead and you have a red bead. That is the variation of only one nucleotide pair.

SNP testing gives you information about your many thousand year old family tree. It will tell you if the man you tested was from a Native American, African, Asian, European, etc. haplogroup. Think of a haplogroup as your ancient kingdom.

When your test results come back, it shows no Native American ancestry. Does that mean the family lore was disproven? No. Look at the family tree above. You only tested one of the possible male ancestors - the colored boxes. You need to trace the untested men to a direct living male descendant and then test their yDNA to prove or disprove for each additional line.

A second use of yDNA is to see if two men we are comparing are from the same male line. Let's say you are researching an ancestor with a common surname. Through your research you find that two men come from the same area, moved together, and lived near each other. They are James Williamson and William Williamson. You suspect that these two men could be brothers, cousins,

*Mopac on Parmer Lane*

We will review chapter 6, Genealogical Applications for X-DNA, in *Genetic Genealogy in Practice*. You do not need to have the book, but it is advised. If you have tested your DNA or are thinking about it, join us! See the [AGS website](#) to register and obtain more information.

The book is available from [Amazon](#) for \$36 paperback or \$9.99 for the Kindle edition. If you are a member of NGS, it is available for \$30.06, or \$36.06 for non-members.

The group was formed to support members in writing their family histories. We meet once a month and have member discussions, presenters, and a place to share our work and give and receive critiques. Our successes thus far: a self-published

uncles, or something. There are other Williamsons in the area that came from other locations so you cannot say absolutely that these two men are related. Your dad is a direct male descendant of James. You traced William's family forward and have a direct male descendant of William willing to take a yDNA test. With this case you will use the STR yDNA test.

STR is the acronym for short tandem repeat. Revisiting our beaded necklace example, a short tandem repeat would be red, red, red, blue beads followed by red, red, red, blue. This pattern is repeated another ten times. These STRs occur at specific places on the yDNA. In our beaded necklace example, the STR value at this location would be 12, meaning that the pattern was repeated twelve times.

When you receive the results, you compare the STR values to determine if James and William are related. At this time, you can purchase STR yDNA tests for 36, 67, or 111 markers. That means the testing company will look at 37 known STR locations, or 67 known locations, etc. In previous years fewer locations were tested. In the future, more locations may be identified for testing. Today, 37 markers are the minimum test recommended. The cost of the STR yDNA test increases with the number of markers tested.

The final use of a yDNA test would be to figure out from which of two men, who are not related, a person descends. As an example, for a use of this test, I will use my great-grandfather's situation. His parents were divorced due to the infidelity of his mother. In the divorce records, her lover told her husband they were having an affair. Both men stated in court records that my great-great-grandmother said that her husband was not the father of my great-grandfather. The lover stated in a deposition the dates of their liaisons. She did not appear in court, so I do not know her side of the story. The dates that the lover provided would not result in the birth of my great-grandfather.

To determine if one of these two men is my great-grandfather's father, I need to test a direct male descendant of my great-grandfather and a direct male descendant of these two men, but not of my great-

book, several blog entries, several memoirs, and a regular article published in the newsletter! Come and get inspired with the rest of us! Open to members of AGS.

### **AGS 2017 Calendar**

*Meetings are held on the 4th Tuesday (no meeting in December),  
Networking: 6:30 PM /  
Program: 7:00 PM  
Highland Park Baptist Church, [5206 Balcones, Austin, TX 78731](#)*

**26-September More than Daughters: Using the DAR's Genealogical Research System (GRS) by AGS Member Teresa Devine**

grandfather's line. I will use the STR yDNA test.

In addition to the three testing situations described above, yDNA tests are also used for surname studies. Surname studies are especially helpful when you have a common surname. One of my husband's ancestors is a Taylor. There is a Taylor yDNA surname group. Of the hundreds of Taylor DNA submissions, my husband matches with only eight other Taylor families that have tested. After comparing their submitted family trees, I can now add two older generations to my husband's family tree.

To learn more about yDNA and other tests, check out these resources: *Genetic Genealogy in Practice* a book by Blaine Bettinger and Debbie Parker Wayne. Ce Ce Moore, another genetic genealogist, has a series of four blog articles about the different DNA tests [here](#).

If you are interested in learning more about DNA, we have a DNA SIG (Special Interest Group) that meets the first Tuesday of each month. They are studying the book *Genetic Genealogy in Practice* by Blaine Bettinger and Debbie Parker Wayne. [Click here](#) for more information

If you have any questions, please email me at [dtipping@att.net](mailto:dtipping@att.net). If you do not use Facebook and have a question for the Members Helping Members group, please email it to me. I will post your question and forward the responses to you.

Next month, we will explore mitochondrial DNA tests and how they can help our research.

*Special thanks to AGS member Reneé Lasswell for her helpful suggestions for this article.*

## AGS 2017 Class Schedule

Information about our classes is available [here](#). All classes are free.

**Saturday, September 16, 10:30a-Noon**  
**Land Workshop Pt. 1 – Metes and Bounds - Cari A. Taplin, CG**  
North Village Branch Library  
[2505 Steck Ave, Austin, TX 78757](#)

*Registration is required for this class to insure there are enough handouts. [Register online.](#)*

*Students need to bring a ruler and pencil to the class.*

Have you ever wondered how to draw those land descriptions from the Metes & Bounds survey system? This system was used primarily in the

"This graveyard was begun for members of the Pond Springs community in the 1860s. The oldest grave is believed to be that of Mrs. Asenath M. Stewart (d. 1862). Also interred here is Mexican War veteran William P. Rutledge, Sr. (1815-1890), and Lavinia Hyland Chapman (1844-1929), a citizen of the Republic of Texas. Although the land was in use as a graveyard years earlier, it was not officially deeded as such by Thomas L. and H.M. Rutledge until 1872, and did not appear in deed records as a cemetery until 1877. It serves as a reminder of early Pond Springs history.

1988 by the Texas Historical Commission. (Marker Number 9324.)"

AGS Board member, Marcia Arn, contacted the Pond Springs Cemetery Association to find out what they might need, and they responded that they could use a new push mower and weed eater. Some Association volunteers buy them on their own, but since the ground is very uneven there, the push mowers don't last a long time. If the association ever dissolves, what they have goes to a Historical Society to continue care. AGS donated \$150 to help provide them with the needed lawn care tools. The Williamson County Genealogical Society and nearby Nyle Maxwell car dealership matched our donation as well.

She also discovered that they know there are more unmarked graves and they are trying to identify who is buried there. They have some records from the 1960s and some other records that they are trying to reconcile to determine who is in what grave. If they cannot find a family member, they try their best to mark a grave correctly. Recently they had two previously unknown relatives contact them. One reported that they marked a grave with the right family name, but the wrong given name. The other was from Houston and said it was marked correctly, but there were two of his slaves and an Indian friend also buried by him. This confirmed their suspicion that there were other graves in that area. It is an old cemetery, truly a pioneer one, with a lot of open space. They are trying their best to identify and mark any unknown graves, but it is a difficult detective job.

An email from Gloria Amescua, Secretary, Pond Springs Historical Cemetery Association, Inc. dated August 1,

original thirteen colonies and so is mostly found when dealing with land in the east. This workshop will describe the system and then take the students through some real examples teaching them how to draw the land shapes as described in old deeds.

North Village Branch  
Library

2017:

"On behalf of the Pond Springs Historical Cemetery Association I want to thank the Austin Texas Genealogical Society for your generous support. In July 2017, we received your donations of \$150. I am sorry this acknowledgement is so late.

Pond Springs Historical Cemetery Association, Inc. is an organization that was created and organized as a benevolent non-profit corporation chartered solely for the purpose of maintaining the graves of early settlers of Williamson and Travis Counties, Texas, and their descendants who are buried in Pond Springs Cemetery. As such, we maintain and preserve all markers and memorials (the cemetery is not a perpetual care cemetery, and provide upkeep of the cemetery grounds.) We also discover, through proper and established research methods, the identity of all persons buried in Pond Springs Cemetery whose markers have disappeared. To date, we have identified 230 persons buried here, and there are many more.

We are sincerely grateful for your support."

## **Humble Genealogical Society Donates 50% of Conference Proceeds to Hurricane Harvey Victims**

The Humble Area Genealogical Society, located near Houston, Texas, is hosting an Online Genealogical conference on Saturday, September 23. Proceeds from this conference will be given to Humble Area Genealogical Society members impacted by Hurricane Harvey.

Humble society member Devon Noel Lee says, "Hurricane Harvey update: My local genealogy society had at least six (and counting) members who lost everything in the flood. Our group had planned a fundraiser for Sept 23rd for our society's preservation efforts. Instead, we're turning 50% of the registration fees over to our society members.

[2505 Steck Ave, Austin, TX 78757](#)

*Registration is required for this class to insure there are enough handouts. Registration will open on September 28.*

This class will go over some of the basics needed to get started with DNA testing for genealogical purposes.

**Saturday, December 9, 10:30a-Noon**

### **How to Teach a Genealogy Class – Panel and Workshop**

North Village Branch Library

[2505 Steck Ave, Austin, TX 78757](#)

*Registration is required for this class to insure there are enough handouts. Registration will open on November 9.*

This will be a panel discussion and workshop for anyone interested in learning how to teach their own genealogy class. There will be a short lecture, a panel discussion with local genealogical speakers, and then a workshop period to help attendees develop their ideas for teaching a class or get tips on public speaking.

---

**Do You Have a Brick Wall? A Genealogical Question?**

"Anyone and everyone interested in genealogy, please register for this conference. You can watch the conference for 30 days if you're unable to participate live. For \$15 you can learn new skills and help provide relief and comfort to our dear society members."

The conference will be webcast on Saturday, September 23, from 8:30am to 4:00pm. For those unable to attend the conference live, replays of the webinars and panel discussion will be available until October 23rd, 2017.

The topics and presenters are:

- Desperately Seeking Susan: Finding Female Ancestors - Amy Johnson Crow
- Which Charles is Which? Separating Same Name Individuals - Melissa Finlay
- Using FamilySearch More Effectively - Devon Noel Lee
- Bankruptcy to Equity: Using Federal Court Records: - Michael L. Strauss
- Panel Discussion with Presenters and YOUR Questions

### **Oral History Workshop**

**Sunday, October 29th**

**1 pm - 4 pm**

**Austin History Center, Holt Gallery / Reception Room**

**810 Guadalupe St, Austin**

Free - RESERVATIONS ARE REQUIRED (limited to 50 attendees)

The Austin History Center Association's Oral History Committee will host a free training session on collecting oral history, facilitated by Lila Rakoczy, Texas Historical Commission's Military Oral History Coordinator.

The workshop is designed for people to learn how to conduct, record, and transcribe all types of oral histories, including hands-on training with digital and video recording equipment.

To be officially registered, please send an email with your phone number and indicating your interest to Allison Supancic at [asupancic@austinhistory.net](mailto:asupancic@austinhistory.net). We will only take a single reservation for the person emailing in. Please make sure you receive a confirmation email from Allison. We will make final confirmation emails/phone calls in the days leading up to the training. We will keep a waiting list once we have reached 50 reservations. Please be 100% sure in your intent to attend. Thank you! For more information, call 512-627-8170 (AGS member Phoebe Allen).

The AHC Association is particularly interested in finding new members for the Oral History Committee who would enjoy interviewing Austinites and/or transcribing interviews.

## From the President's Corner

Anne Mamiya, AGS President  
[president@austintxgensoc.org](mailto:president@austintxgensoc.org)

We have sure seen nature take its toll recently. The fires out west have been burning for quite some time. Then, closer to home, there was Hurricane Harvey. I am sure many of our members have family and friends in the affected areas. My thoughts and prayers go out everyone facing the recovery from Harvey's toll. The destruction and loss caused by smoke, fire, wind and water can be devastating.

Harvey is a good reminder to us all, who are the historians in our family, to have a good disaster plan for our research, documents, photos, and heirlooms. Please take the time now to make sure you have a good plan. Fortunately, we have the option to digitize and store much of our collections with redundancy using today's technology. It doesn't take the magnitude of Harvey to cause loss of our records. It could be a simple house fire or broken pipe. Create your action plan now.

I hope to see all of you at our September meeting. Our Nominating Committee will announce the slate of nominees to the Board of Directors for the next term at this meeting.

---

## August Meeting Recap

**Topic:** The Importance of Mapping Cemeteries, Not Just Recording the Names

**Speaker:** Dale Flatt

**August Meeting Attendance: 40**

**Visitors:** Warren Friedrich, Karen Listen and Linda Schwarzlose

Thank you to the following volunteers for their help at the August meeting: Ann Kippen, Debbe Tipping, Shelly Augustin, Anne Mamiya, Nan Kilkeary, Erin Garcia, Tracy Tipping, Dee Sanchez, John Marostica

**Sign-Ups for September Meeting**

Set Up – Shelly Augustin & Elaine Powell

Snacks – Jan Pelosi, Susan Tyler, Teresa Devine, & Rob Richardson

Clean Up - Anne Mamiya & Robin Rabin

Greeter – Lori Henry & Glenda Martin
